Application filing date 29.05.2014
Country of origin GE
Published designation MANAVI
ICGS 33
Type of good or specific product wine

Description of special quality of the good :

“*Manavi*” is controlled premium-quality, white dry wine of designation of origin. The vintage to produce the wine “*Manavi*” is held when the sugar content of the grape is 190 gr/dm³ and the titrated acidity is 5,5-7,5 gr/dm³.

Wine “*Manavi*” is controlled premium-quality white dry wine of geographical appellation. It is made of the grapes species of “*Kakhuri Mtsvane*” and 15% of “*Rkatsiteli*” may also be used. Wine “*Manavi*” is characterized from light straw to straw colour, with greenish tint, with delicate, harmonious, gay and elaborate taste, fruit aroma and species-specific aroma and developed race.

Volumetric spirit-content, % - 10,5-12,5

Titrated acidity – 5-7 gr/dm³

Volatile acids of no more than 1 gr/dm³

Mass sugar concentration of no more than 0,3 gr/dm³

Mass concentration of finished extract of no less than 16 gr/dm³

Concentration of total mass of sulphuric acid of no more than 210 gr/dm³

Concentration of free sulphuric acid of no more than 30 gr/dm³

Link with the geographical origin:

The areas for raw material in the micro-zone of the wine “*Manavi*” is approximately 346 ha.

The expected volume of conditional harvest is 2425 tons. At the output of 65 decalitres out of 1 ton, 157 000 decalitres of bulk wine may be produced.

The geographical location of the micro-zone of “*Manavi*”, elevated-plain slightly dissection relief of Iori Upland, transitional climate from subtropical to moderately humid subtropical, dark brown calcareous soils (of Chernozem type) and special features of the species “*Manavi*” make for peculiar values of wine “*Manavi*”.

Geographical zone:

“*Manavi*” is a Viticulture unique region, located in Outer Kakheti, administrative Region of Sagarejo, on the foothills of southern and adjacent slopes of Tsiv-Gombori Ridge, with the coordinates of northern latitude of 41°44′ and eastern longitude of 45°27′ and nearby.

Industrial vineyards are mainly located at 450-800 m above sea level. Physical-geographical individuality of this part of Iori Upland is the result of its joint heightened-plain, wavy, slightly dissection relief and the location in the zone with the climate transient from Continental to Sea.

The micro-zone of the wine “*Manavi*” includes the following villages: Tokhliauri, Manavi, Burdiani, Giorgisminda, Antoki, Mariamjvari, Didi Chailuri, Patara Chailuri, Kakabeti and Verkhviani.
